F.No.2/HCC/HP/2025/11/02

Date: 10.11.2025

To,
The Principal
Holy Cross College, Agartala

Respected Father,

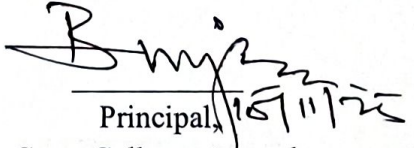

We are happy to inform you that the Dept. of Human Physiology is willing to organize the **Deworming Campaign** in association with **Primary Health Centre, Health and Family Welfare Department, Govt. of Tripura** under **Mukhyamantri Sustho Shaishob Sustho Kaishore Abhiyan (MSSSKA)**, on **11th November 2024 (Tuesday)** within the College Campus. In this regard, **Albendazole tablet (100 nos.)** will be distributed among under 19 years age group of students. This will help children and teenagers to remain healthy and fit.

I hope you will grant us the permission to do the same.

Yours faithfully-

Approved by-

Report on "NATIONAL DEWORMING CAMPAIGN"

Date of Event: 11th November 2025

Place: Holy Cross College, Jubatara, Tripura (W)

Time: 10:00 AM

Venue: F2 - 8

Soil-transmitted helminths (STH) remain a significant public health challenge in India, with an estimated 22 crore children aged 1–14 at risk of worm infections. These infections can impede nutrient absorption, leading to anemia, malnutrition, and compromised mental and physical development. In Tripura, where the prevalence of worm infections stands at around 60%, deworming initiatives are being implemented in alignment with the Government of India and WHO guidelines. The primary objective of National Deworming Day (NDD) is to administer deworming treatment to children and adolescents aged 1–19 years through Anganwadi centers, schools, and colleges, thereby improving their health, nutritional well-being, access to educational opportunities, and overall quality of life.

As part of this initiative, the Department of Human Physiology, Holy Cross College, Agartala, organized a National Deworming Campaign on November 11, 2025, under the banner of Mukhyamantri Sushto Shaishob Sustho Kaishore Abhiyan 8.0 (MSSSKA 8.0). Faculty members from the department sensitized the participants about the health hazards associated with worm infestations and the importance of periodic deworming. Deworming medicines, including Albendazole tablets along with Iron and Folic Acid supplements, were distributed to the participants, supplied by the concerned Primary Health Centre.

Detailed instructions regarding the proper dosage and safe consumption of the medicines were explained to the students to ensure effective and safe administration. A total of 100 participants took part in the campaign and received the deworming medication successfully.

The report is prepared by

Mr. Kanak Chakraborty

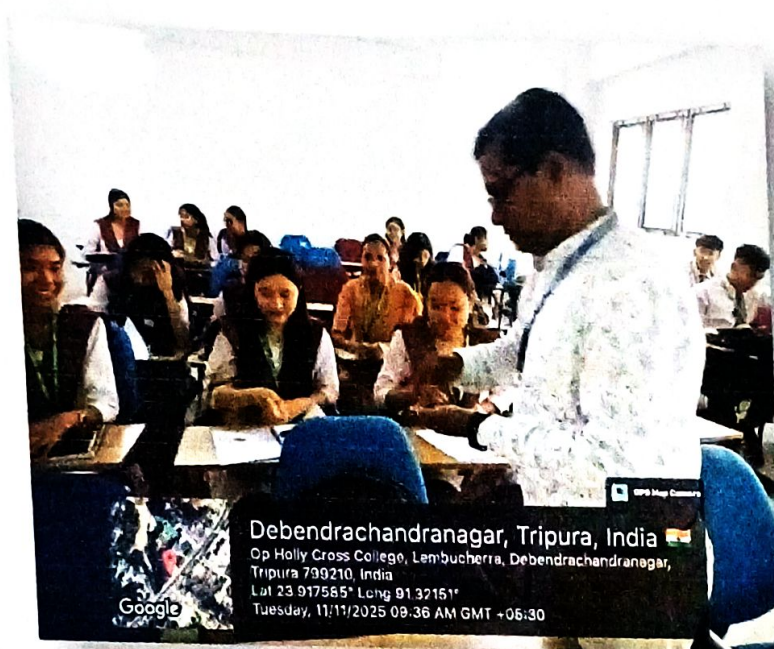

Assistant professor, Department of Human Physiology
